## 22st SAG Workshop

on Tuesday, 04<sup>th</sup> of June 2024  
face-to-face in Bad Vöslau/Austria and online as webinar  
(hybrid)

Topic:

### Sonic Tomography – comparative measurement

The effect of different sensor positions on the picture produced by Sonic Tomography will be analyzed. How these pictures are produced and interpreted and how to find the path from the picture to the safety against fracture will be discussed.

**Program** (time CET = UTC + 1/Berlin)

- 08:00** Short welcome and introduction
- 08:15 Lecture 1,5 hours and 15 minutes discussion  
**Lothar Göcke**  
“Strengths, weaknesses and challenges in Sonic Tomography”
- 10:00 Measuring selected trees in the park Bad Vöslau in different groups.
- 12:30 Lunch
- 13:30 Presentation of evaluations of unfavorable and favorable sensor positions in one tree, with a subsequent discussion.
- 14:30 Discussion of pictures by Picus, how are they produced and how should they be interpreted.
- 15:30 Coffee break
- 16:00 Discussion: How to find the path from the picture to the breaking safety. Are there several possibilities
- 17:00 Summery and final discussion
- 18:00** End of the event

The day before, Monday morning we hold a presentation and discussion about an optical tree control concept by Rainer Prosenz. In the afternoon, at 1:30 pm, the Annual General Meeting of SAG Baumstatik e.V. will take place (agenda will follow soon).

Wednesday the first meeting for a SAG Standard for inspection of trees by a tomographic method will take place.

Language English

Time: Tuesday, 04. 06. 2024, 08:00 bis 18:00

Location: Colleg Garden Hotel, Johann Strauß Straße 2, 2540 Bad  
Vöslau, Austria.
